PROJECTS

FWS- Legal Aid Platform

[Link to Demo](#)

Developed a user-friendly legal aid platform for a non-profit organization to provide better support to children and women in need. Built using React, TypeScript, and Tailwind CSS. Deployed as a web application on Vercel and an Android app via Median.co.

Trust Ranker (E-commerce Recommendation System)

[Link to Demo](#)

Engineered an e-commerce recommender web application using Flask, SQLAlchemy (MySQL), and Pandas. Utilized DuckDuckGo and BeautifulSoup to serve top product recommendations with live retailer links, images (with fallbacks), and secure login/signup flows. The system also features trending products seeded from a CSV file.

CampusCore (Student Management System)

[Link to Demo](#)

Created a Python desktop student management system with a CustomTkinter GUI. The system includes role-based login (Admin/Hostel/Mess), full CRUD functionality for student records, attendance tracking, CSV export, and data analytics powered by SQLite and Matplotlib.
